

Advanced intercultural Communication

■ This course focuses on communication, culture, power, and social justice. Power plays an important role in how we interpret differences and communicate with those we perceive as being culturally different from us. We will explore how power and ideology shape how we make sense of culture and identity and communicate across differences at individual, group and even larger levels (e.g., national, global levels) in personal, professional and public contexts. We will do this with a clear focus on social justice and advocacy.
