

Professional Communicator Credential

13 CH

Show employers that you're a competent professional communicator with verified badges that go on your LinkedIn profile, email signature, etc.

Take these courses (then a competency evaluation) to earn a verified badge for each to show off your progress. Can be completed online!

CMST 101

CMST 262

CMST 280

CMST 383

Because CMST 101 is a required university course, the credential is only 3 additional courses + 1 CH competency evaluation.

Pass the courses and the competency evaluation to get this badge, which employers can verify.*

Why Invest in this Credential?

Get noticed by employers with our Professional Communicator Credential. After completing the credentialing curriculum and passing the competency evaluation, you will earn a verified digital badge that certifies you have the knowledge, skills, and abilities to communicate effectively in any professional context.

Digital badges can be added to digital portfolios and can be shared on LinkedIn, email signatures, and other platforms, distinguishing you from other applicants in a competitive job market. (Scan or click the code to read more about how digital badges help job seekers.)
