Open, inclusive, and broad in focus, the series covers scholarship on a wide range of crime and justice issues, including the exploration of understudied subjects relating to crime, its causes, and attendant social responses. Of particular interest are works that examine emerging topics or shed new light on more richly studied subjects. Volumes in the series explore emerging forms of deviance and crime, critical perspectives on crime and justice, international and transnational considerations of and responses to crime, innovative crime reduction strategies, and alternate forms of response by the community and justice system to disorder, delinquency, and criminality. Both single-authored studies and collections of original edited content are welcome.
